**Strategic Resources Announces Collaboration Agreement with Tacora Resources**

**Montreal, Québec – Strategic Resources Inc. (TSXV:SR)** (the “Company” or “Strategic”) is pleased to announce that it has signed a Collaboration Agreement (the “Agreement”) with Tacora Resources Inc. (“Tacora”) that will explore using Tacora’s iron ore concentrate to feed Strategic’s planned Phase 1 High-Purity Iron Pelletizer project (the “Project”) at Port Saguenay. The Agreement will focus on testing of Tacora’s iron ore concentrate to determine the suitability for the direct reduction grade pellets that Strategic plans to produce from the Project. The Agreement considers Strategic purchasing up to 25% of Tacora’s future expanded throughput capacity. This could provide the Project with approximately 25% to 40% of the required iron ore concentrate feed for pelletizing.

**Sean Cleary, CEO of Strategic commented:** “We are pleased to be engaging with the Tacora team, who’s new leadership has an impressive, demonstrated track record in the iron space. Local Canadian iron ore sources such as Tacora’s Scully Mine in the Labrador Trough will help to increase downstream value creation within the Canadian iron ore industry and enhances the overall development of clean, green steel inputs in Canada.”

**Brian Penney, CEO of Tacora commented:** “Tacora is committed to supporting the transition to a low-carbon economy, and this collaboration with Strategic Resources represents a significant step in that direction,” said Brian Penney, CEO of Tacora Resources. “Our high-grade iron ore is already being used in the direct reduction iron market, and through this partnership, we will be exploring new opportunities to help drive the growth of green steel production. This is a key part of our strategy to provide high-quality, sustainable products that meet the evolving demands of the global steel industry.”

**About Tacora Resources**

Tacora is a private company focused on the production and sale of high-grade and high-quality iron ore products that improve the efficiency and environmental performance of steel making customers in Europe, in the Middle East, and Asia. The Company owns and operates the Scully Mine, an iron ore concentrate producer located near Wabush, Newfoundland and Labrador, Canada with a production capacity of six million tonnes per year. Additional information about the Company is available at [www.tacoraresources.com](http://www.tacoraresources.com).

**About Strategic Resources**

Strategic Resources Inc. (TSXV:SR) is a critical mineral development company focused on becoming a supplier of green steel inputs. The Company has a planned metallurgical facility site in Canada and high-purity iron and vanadium projects in Canada and Finland. The Company is developing its flagship BlackRock Project, which is a fully permitted and ready to construct mine, concentrator and metallurgical facility located at a seaport in Québec with full access to the St. Lawrence Seaway. Phase 1 of the BlackRock project now envisages building a 4 million tonne per year high-purity iron ore pelletizer in Port Saguenay. The Company’s Head Office is in Montreal, Québec.
